PROJECTS

Front-end Design

Portfolio Website for Photographer

- Designed and developed an amazing portfolio website using HTML, CSS, and JavaScript.
- We utilized CSS animations and transitions to improve the visual appeal.
- Implemented a responsive grid layout to showcase photography work on various devices.
- Integrated contact forms and social media links for increased connectivity.

Result: Attracted new clients, leading to a 20% increase in business inquiries.

WordPress

E-Commerce Store for Handmade Goods

- WordPress E-commerce Store for Handmade products
- We created a bespoke WooCommerce site with the Divi theme for online trading.
- To enhance the user experience, we came up with clear descriptions and high-quality images for product page design.
- Secure payment gateways were integrated as a shopping cart system that is easy to use for clients.
- SEO best practices were implemented to improve visibility as well as drive traffic to the website.

Result: There was a 35% increase in sales recorded during the first quarter after its launch.
